Subject:

McDowell County Preliminary Assessments, Site Reassessment Reports

Dear Ms. Wendel:

Please find enclosed two data disks containing scanned image files for 21 Preliminary Assessments and 2 Site Reassessment Reports performed by the NC Superfund Section in response to citizen petitions forwarded to your office. Site names and their corresponding report dates are listed in the attached table.

If you have questions regarding these reports, or need additional digital or paper copies, I can be reached at (919) 508-8449.

Sincerely,

Jim Bateson, Head

Site Evaluation and Removal Branch

Subject:

PRELIMINARY ASSESSMENT

Haldex Brake Products Corporation

(NCD131416182, RCRA ID)

5334 US 221 South

Marion, McDowell Co., NC 28752

Dear Ms. Wendel:

Due to a citizen petition, this site was screened for potential listing under CERCLA. Based on findings of this Preliminary Assessment, it is recommended that this site not be listed on CERCLIS for further study.

- 1. The coordinates of the site are 35.62616° north latitude and -81.98650° west longitude. These are the coordinates listed in the US EPA Envirofacts database and were confirmed on the USGS Topographic map (Ref. 1, Fig. 1). The facility is on Highway 221, about one mile south of I-40.
- 2. Haldex Brake Products Corporation was formed in 2003 and is a Small Quantity Generator (NCD131416182) of Hazardous Wastes (Refs. 1, 2, 4). Business at the location was established in 1985, and the RCRA ID number was issued to Midland Brake in 1986 (Refs. 2, 3). Previous owners include Haldex Midland Corporation (formed in 1998, subsequently withdrawn) and Midland Brake, Inc. (formed in 1985 and withdrawn) (Refs. 1, 2, 4). Across Highway 221 from Haldex is NC Department of Corrections Minimum Security Unit, a Tier II facility (Ref. 4).
- 3. Haldex Brake Products Corporation has 110 employees and remanufactures truck braking components (Refs. 3, 5). Parts are baked to remove any oil/grease residues. The parts are then shot blasted to remove any rust. The shot blast waste is considered a hazardous waste because of the cadmium levels. Parts are also painted as part of the operation. Solvent is used to clean guns at the spray booth (Ref. 5).

1646 MAIL SERVICE CENTER, RALEIGH, NORTH CAROLINA 27699-1646 401 OBERLIN ROAD, SUITE 150, RALEIGH, NC 27605 PHONE: 919-508-8400 \ FAX: 919-715-3605

- 4. A review of Enforcement and Compliance history shows no Hazardous Waste handling violation within the last five years. The review of RCRA files showed that Midland Brake was issued the Generator number (NCD 131 416 182) in 1986. The 1989 annual report showed the facility generated a solvent mixture containing methylene chloride (F001), spent lacquer (F003), painting thinner (F005), parts cleaning (D001), spent mineral spirits, cleaning (D001), spent isopropanol (D001), spent wash/rinse water (D006) and paint sludge (D008). All of these wastes were shipped to a TSD or recovery facility. A review of several annual inspection reports shows the facility was in compliance (Ref. 5).
- 5. A 1994 RCRA inspection noted potential exposure of a worker to cadmium-contaminated dust. A 1994 letter from the company noted that the facility had changed the process of handling cadmium-contaminated dust and reduced the amount of hazardous waste generated. The re-inspection showed facility was in compliance. In 1998, Haldex Midland Brake requested a transfer of the EPA ID number from Midland Brake to Haldex Midland Brake. The 2000 Small Quantity Generator Inspection Report showed the facility was in compliance (Ref. 5).
- 6. In 1993, Haldex Brake Products was issued the non-major NPDES permit (NCG030020) for stormwater discharge to surface water. This NPDES permit was re-issued in 2007 to Haldex Services Corporation Marion Division. No inspections or violations are on record (Ref. 1).
- 7. Haldex Services Corporation -- Marion Division holds an air minor permit (3711100165). Regular inspections have occurred, and there was one informal enforcement action over the last five years (Ref. 1).
- 8. A review of data of the nearest seven transient, non-community wells does not show any contamination (Ref. 4). Given the rural nature of the immediate vicinity (Fig. 2), it seems likely that there are some private wells nearby; however, they nearest well has not been located. There are no records of spills or any groundwater incident associated with this site (Refs. 1, 4, 5).
- 9. Overland flow from the site would flow about 800 feet and enter Muddy Creek (Fig. 1). Muddy Creek flows in a generally northeasterly direction and joins the Old Catawba River about 14 miles below the PPE. The 15-mile surface water pathway ends on the Old Catawba River just upstream of the confluence with the outfall from Lake James. There are no surface water intakes within the 15-mile surface water pathway.

Ms. Wendel June 12, 2008 p. 2

10. Haldex Brake Products Corporation is an active company, and operations began at this site around 1986. It has several permits and this review indicates that it is operating within regulatory framework. There are no CERCLA concerns with this site.

Based on the findings of the Preliminary Assessment, it is recommended that not be evaluated further under CERCLA. Please feel free to contact either Jeanette at (919) 508-8449 or Jim at 508-8447, or via email at <jeanette.stanley@ncmail.net> if you have any questions.

Sincerely,

Jeanette Stanley,

Environmental Chemist II NC Superfund Section

Site Location:	5334 US 221 South, Marion, McDowell	Co., NC 28752
Latitude:	35.62616 °	Longitude: 81.98650°

Describe the release (or potential release) and its probable nature:

As part of a citizen petition, this site was reviewed for potential listing under CERCLA. The active facility has 110 employees and remanufactures truck braking components. They have several permits and appear to have been operating within regulatory framework since business was established at this location around 1985. The facility is a Small Quantity Generator under RCRA.

Part 1 - Superfund Eligibility Evaluation

If a	If all answers are "no" go on to Part 2, otherwise proceed to Part 3.		
1.	Is the site currently in CERCLIS or an "alias" of another site?		х
2.	Is the site being addressed by some other remedial program (Federal, State, or Tribal)?		x
3.	Are the hazardous substances potentially released at the site regulated under a statutory exclusion (e.g., petroleum, natural gas, natural gas liquids, synthetic gas usable for fuel, normal application of fertilizer, release located in a workplace, naturally occurring, or regulated by the NRC, UMTRCA, or OSHA)?	x	
4.	Are the hazardous substances potentially released at the site excluded by policy considerations (i.e., deferred to RCRA corrective action)?	х	TRANSPORT OF THE
5.	Is there sufficient documentation to demonstrate that no potential for a release that could cause adverse environmental or human health impacts exists (e.g., comprehensive remedial investigation equivalent data showing no release above ARARs, completed removal action, previous HRS score determined, or an EPA approved risk assessment completed)?	Address A. A. A.	х

Please explain all "yes" answers.

The site has generated several waste streams over the years, including a solvent mixture containing methylene chloride (F001), spent lacquer (F003), painting thinner (F005), parts cleaning (D001), spent mineral spirits from cleaning (D001), spent isopropanol (D001), spent wash/rinse water (D006) and paint sludge (D008). Wastes have been shipped off site; there is no indication there have ever been spills at the site. The facility operates under several permits and is in compliance.

UCC Filings

About UCC Fillings

The UCC (Uniform Commercial Code) records report property pledged as collateral to creditors. If a company already has claims on its assets, this may influence your decision to extend credit.

No UCC Filings are currently in our database for this company.

However, we currently do not have UCC information from every state. For details on our UCC coverage, click About UCC Codes.

The data has been obtained from the Secretaries of State, or other governing bodies of the various states. Neither the states, nor infoUSA warrant the completeness or accuracy of the data. For certified copies of UCC filings, make a request from the appropriate Secretary of State's office.

Jeanette Stanley, Environmental Chemist, NC Superfund Section

DATE:

June 9, 2008

SUBJECT:

Haldex Brake Products Corporation

(NCD 131 416 182, RCRA)

5334 US 221 South

Marion, McDowell Co., NC 28752

Today, I reviewed the map of community wells available on the NC Division of Water Quality, Water Supply Watershed Protection, Source Water Assessment and Protection web site. This site also locates several other types of properties with potential environmental concerns, including groundwater pollution incidents, Tier II Sites, and Underground Storage Tank (UST) permits. [A Tier II Site stores hazardous materials and is subject to the reporting requirements of SARA Title III Section 312, Emergency Planning and Community Right to Know Act.]

I identified seven transient, non-community wells about ¾ mile from the site. Super 8 and Days Inn wells are to the north; West Court No. 2, Glenwood UMC, L & R Country Store, and Glenwood Country Store wells are to the south; and Mount Pleasant Baptist Church well is to the west. I referenced US EPA Envirofacts Warehouse Safe Drinking Water Information System and reviewed analysis reports for these seven systems. Three of the seven systems had one coliform violation in the past ten years, but all are now in compliance. None of these systems showed any chemical contaminants.

The map available on the NC Division of Water Quality, Water Supply Watershed Protection, Source Water Assessment and Protection site also showed that Glenwood Grocery, near the Haldex Brake property, has a UST permit. Across Highway 221 from Haldex is NC Department of Corrections Minimum Security Unit. This facility is a Tier II site. A review of the NC Groundwater Incident database did not reveal any incident at Haldex.

When reviewing files in the NC Hazardous Waste Section (aka RCRA files), I noted that Haldex Brake was formerly known as Midland Brake. A review of the Enforcement and Compliance online database showed no listings for Midland Brake.

FROM:

Jeanette Stanley, Environmental Chemist, NC Superfund Section

DATE:

June 11, 2008

SUBJECT:

Haldex Brake Products Corporation

(NCD 131 416 182, RCRA)

5334 US 221 South

Marion, McDowell Co., NC 28752

The review of RCRA files showed that Midland Brake was issued the Generator number (NCD 131 416 182) in 1986. In 1988, the status was changed to Generator from Small Generator. The 1989 annual report showed the facility generated a solvent mixture containing methylene chloride (F001), spent lacquer (F003), painting thinner (F005), parts cleaning (D001), spent mineral spirits, cleaning (D001), and spent isopropanol (D001). All of these wastes were shipped to a TSD or recovery facility. The facility also generated spent wash/rinse water (D006) and paint sludge (D008) that were shipped to a TSD or recovery facility. A 1990 annual report showed the same categories of wastes were likewise shipped offsite. A 1993 inspection showed the facility was in compliance.

A 1994 RCRA inspection noted potential exposure of a worker to cadmium-contaminated dust. A 1994 letter from the company requested its status be changed from "Large Quantity Generator" to "Small Quantity Generator" due to reduction of amount of hazardous waste generated. In this letter, the company stated they had changed the process of handling cadmium-contaminated dust. The re-inspection showed the facility was in compliance. In late 1994, Midland Brake status was changed to Small Quantity Generator. In 1998, Haldex Midland Brake requested a transfer of the EPA ID number from Midland Brake to Haldex Midland Brake. The 2000 Small Quantity Generator Inspection Report showed the facility was in compliance.

In 2000, operations were described as follows:

"The facility remanufactures truck braking components. Parts brought in are baked to remove any oil/grease residues. The parts are then shot blasted to remove any rust. The shot blast waste is considered a hazardous waste because of the cadmium levels. Parts are also painted as part of the operation. Solvent is used to clean guns at the spray booth."

The 2000 inspection stated that waste solvent was immediately transferred to 55-gallon containers located in the hazardous waste storage area. The facility maintained a 55-gallon container at each of the shot blast machines to collect the hazardous waste generated from the process. Inspections of the <180 day storage area had been documented and maintained. Containers were labeled, dated, and closed, and no releases were observed in any areas. The facility maintained a 150-gallon above ground tank for the storage of used oil.

Mr. Larry Horton
Midland Brake, Inc.
P.O. Box 1129
Marion, North Carolina 28752

RE: NEW EPA ID NUMBER NCD131416182 FOR GENERATOR

Dear Mr. Horton:

Listed above is your EPA ID number which we just received from EPA. As a generator you should be familiar with NCAC 10F North Carolina Hazardous Waste Management Rules .0002 Definitions; .0029 Identification and listing of Hazardous Waste - Part 261; .0030 Standards for Hazardous Waste Generators - Part 262; and .0033 paragraph (b) subparagraph 256.16 Personnel training, paragraph (c) Preparedness and Prevention, paragraph (d) Contingency Plan and Emergency Procedures, paragraph (i) Use and Management of Containers, and paragraph (j) Provisions for Tanks.

You will be inspected at a future date to insure compliance with the above rules, a copy of which is attached. To obtain a complete copy of the North Carolina rules, or if you have any questions contact the Solid & Hazardous Waste Management Branch, Division of Health Services, Box 2091, Raleigh, NC 27602 (phone) 919/733-2178. There is a \$2.00 printing charge for a complete copy of the rules.

We are placing you on our mailing list to keep you updated on rule changes.

NCSU provides a training program for generators which you may want to attend. Call Michelle Howell at 919/733-2261 for details.

RE: EPA ID No.: NCD131416182

Dear Sir:

Based on information supplied by you for the site identified with the above EPA ID number, the state has accepted and processed the change RCRA listing or information that you requested.

Added As: Generator

Deleted As: Small Generator

Listed below is site information contained on our computer files:

COMPANY NAME Midland Brake, Inc.

OWNERSHIP Echlin Inc.

CONTACT Horton, Larry

PHONE NUMBER (704)652-9308

LOCATION ADDRESS Hwy 221 South

CITY, STATE & ZIP Marion NC 28752

Please verify that the above computer listing/information is correct by notifying us of any corrections.

We are advising EPA of the change. Please notify us if there is any further change in your operations which would affect your status. Your EPA ID number has not been inactivated.

Dear Mr. Edwards,

This is to confirm my phone conversation with you on September 30, 1994. As noted by phone, while conducting a routine RCRA inspection at MIDLAND BRAKE, INC., I noted potential exposure of a worker to cadmium contaminated dust during transfer between containers. The dust is regulated as a hazardous waste and is generated from shotblast operations. The facility: MIDLAND BRAKE, INC.

HWY 221 SOUTH, PO BOX 1129 MARION, NC 28752 704-652-9308 CONTACT: DWIGHT HUSSEY

Based on the above information, I am referring this site for your review. Thank you for your assistance in this matter. Should you have further questions or comments concerning this matter, please contact me at 704-251-6208.

Sincerely

Spring Allen

RE: EPA ID No.: NCD131416182

Dear Sir:

Based on information received by this office for the site identified with the above EPA ID number, the State has accepted and processed the change in RCRA classification or information for the above listed site.

Your EPA ID number is active.

Current computer record of your facility contains following information:

(X Indicates Operational Status of Your Facility)

- LARGE GENERATOR

X SMALL ONTY. GENERATOR

- TRANSPORTER

- TREATER

- STORER

- DISPOSER
